

FLUP JA

PHOTOGRAPHIC PAINTINGS

ABSTRACT LANDSCAPE

FLUP JA

PHOTOGRAPHIC PAINTING

I use the photo camera as a medium instead of the paintbrush, hence the concept of photographic painting.

My approach is to cut out of the natural and urban landscape the canvas for my painting, which is essentially abstract in the sense that it refers to contemporary painting.

It reveals the beauty of the world of shapes and colours that evoke reverie, poetic imagination and lyricism, a form of visual meditation that invites contemplation on the richness of life in all its forms.

This approach is classified by theme, with abstraction in all its forms - lyrical, poetic, geometric, minimalist, or as poor art - as an essential element.

The themes covered are: skies and clouds, rocks, urban or natural floors and walls, microscopic elements in earth, water, wood & metal.

My essential message is to look around you and discover that contemporary art is everywhere in the natural & urban environment, in the universe. It's a question of an enriching outside view. It's up to each of us to detect a part of it.

All my photographic painting are a means of depicting an image that does not have systematically an immediate association with the object world. It can isolate a fragment in order to create something unreal from a real object. My own main purpose is to convey a feeling, a sensation or an impression who put you in a different post of view. It draws away from natural appearances and recognisable subjects in the actual world & sometime make ambiguity between macroscopic & microscopic view or the real scale of the view who can be discover as an abstract landscape who stimulate our own imagination.

Virtual Exhibition

Moments of Color

Exhibition Duration:
December 2020 – March 2021

This is the second totally virtually presented exhibition by Blank Wall Gallery. From the first one we already realized that there was a great interest for this kind of exhibition, especially these days when the conditions are quite different from the ordinary. This second exhibition was an even greater success, given the number of artists who submitted their work in the first place. This is an exhibition that will last for four months and will give the artist the chance to show their work to a new, international market that may be hiding many new opportunities for them. 178 photographers present their work and vote for the best photographs. The rank of the six photographers who were distinguished is presented below.

NEW EXHIBITION

Nava Derakhshani # Eswatini
Nguyen Phuoc Hoai # Vietnam
Nickolaos Tzigizis # USA

Photography exhibition
Landscapes
Exhibition Duration:
27 August – 8 September 2021

Landscape photography is always liked by people, especially by those who love nature. Through the photographic lens and the camera, viewers are taken to many places around the world, both known and unknown. The photographer is always of course the one who has the final word on what it is depicted. After having spent hours outdoors, trying to capture the perfect moment, they present us with the results of their effort. Viewers admire this final result sometimes totally unaware of the difficulty and the effort put into it. This admiration is sometimes all photographers are looking for and the visual travel is something people really need, especially those days, when travelling is so difficult.

Photography exhibition

White

Exhibition Duration:
10 September – 22
September 2021

White is the dominant element of this exhibition. It symbolizes purity and light but it can also become cold and impersonal. It symbolizes lack of emotions, but it can also stress the brightness of all the colors that are close to it.

White is also associated with winter, snow and happiness as well as difficulty and cold. This color can provoke positive as well as negative feelings. This group exhibition celebrates white in different aspects of our life and photographers give their own opinion of this color. In some cases, white stresses sterilization and coldness while in others it is bright and welcoming as the colors which co-exist with it are.

Photography exhibition

Fine Art

Exhibition Duration:
29 October – 10 November
2021

"Fine Art" Photography is a different aspect of reality. A more poetic and artistic version of what we see around us. It is the world through the eyes of another individual. That is why it is interesting, although sometimes far from our perspective. Sometimes it comes as a surprise. We can see the artists' inspiration, as well as their view of the world. Emphasis is on different details and things which can be insignificant to us emerge and gain importance. The result of all these is really amazing. Details we fail to notice acquire a totally new existence through the photographers' lens.

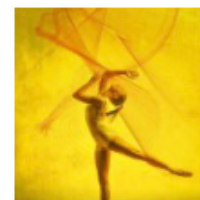

Participating artists:

Christos Magoulas # Greece
Christos Provias # Greece
Costas Panagiotopoulos # Greece
Daniel Agra # Spain
Daniel Castonguay # Canada
